

Mouth Literacy - No Code Required

Founder-deep plain language. If any word is undefined, leave and open doc 18 first.

Source: doctrine synthesis | Prerequisite: 18 Layer 0 atoms

PREREQUISITE: Doc 18 (Layer 0 atoms). If you cannot define DENY, can, may, LIVE, Clear - stop and do 18 before this page.

One sentence

Nisaba is the Action OS: we sit on permission for irreversible acts. Scarcity is a DENY that holds, with a receipt a stranger can open.

The problem we sit on

Modern systems multiply what they can do - pay out, peg out, bind, agent side effects. Catastrophe and liability often come from completing an irreversible write when may is missing. Can is cheap. May is scarce.

can: Able to perform the write (API works, keys exist, agent has a tool).

may: Allowed to complete under live authority, policy, and proof.

The four laws (memorize - with definitions)

- 1. can != may - Ability is not permission. Diligence asks: where can the write still complete without may?
- 2. clearance != execution - Gate may permit; Gate does not move the money. Exclusive edge executes after permit.
- 3. CHARGE-only resurrect - DEAD means stop. Only CHARGE returns LIVE - not dashboard politeness.
- 4. Clear <=> reconstruct - Clear means proof rebuilds as presented AND LIVE. A GO sticker alone is not Clear.

Family map

- Erra: Should we act?
- Velaru: Did we commit correctly?
- Gate: Does the irreversible write complete?
- Verra: Did both rails clear before bind?
- Mishara: Was a person harmed?

Money faces vs the firm

- Diligence (\$2,500 deposit) - paid find of may-gaps. Not a weld.
- Bind Room (\$1,750) - examiner halt artifacts. Not a weld.
- Operator / register / weld - fortune lane when exclusive path is real.
- Prefinality is law inside Nisaba - not a sister company.

Honesty bit

their_production: false until a recorded third-party exclusive production weld. Demo hops are museum.

First commercial driver

Withdraw / payout - clear before wire. Prove DENY on one money-leave path before grid or force cosplay.

Retrieval drill (blank page)

- Write the one sentence.
- Define can vs may with one money example.
- Define DENY without saying deny.
- Explain why Gate saying yes is not money leaving.
- Explain DEAD and what alone can resurrect.

11 Mouth literacy

- Explain Clear in one sentence.
- Name Erra, Velaru, Gate questions in order.

What this is not

- Not AI governance slideshows that never sit on the write
- Not claiming production you do not have
- Not a substitute for Layer 0 atoms (18)
