

Nisaba Action OS - Study Pack

Readable study documents for the irreversible-write mouth.

Source: gate.study-pdfs/

How to use

Read in order. After each document, close it and retrieve from memory. Cash first (Friday send). Depth in parallel (15-20 min/day).

The four laws

- can != may
- clearance != execution (write_executed false on Gate clearance)
- CHARGE-only resurrect (DEAD -> LIVE)
- Clear <=> reconstruct (presented AND LIVE)

Document list

- 01 SCIENCE - can/may and Tier-S contribution
- 02 Action OS - company nature
- 03 Science PRI - formal PRI and first weld
- 04 Mouth mechanics - fuse, fail-closed, /v1/act
- 05 Write edge - Cloudflare worker
- 06 Prefinality - Clear before finality
- 07 Married write - spend + tickets
- 08 Bind Room - money face
- 09 Friday send pack - outbound
- 10 Production honesty - their_production
- 11 Mouth literacy (NO CODE) - start here if code-anxious
- 12 Code reading for Gate - map literacy
- 13 Foundations trunk - layer-1 heart without textbook cosplay
- 14 Cash & clearance arithmetic - GENERAL (Gate-tied)
- 15 Logic & irreversible acts - GENERAL (Gate-tied)
- 16 Read the system - GENERAL (Gate-tied)
- 17 Uncertainty lite - GENERAL (Gate-tied)

Suggested path if weak at code

- 11 -> 01 -> 02 -> 03 -> 08 -> 09 -> 12 -> 04 -> 05 -> 06 -> 07 -> 10 -> 13
- General subjects after mouth basics: 14 -> 15 -> 16 -> 17 (or 14 first if Friday money math is foggy)

Near-term rule

Deploy live. Send Friday pack. Quit on clear. Retrieve daily. Clearance rooms after surplus. General docs sharpen judgment - they do not replace DEPOSIT asks.
