

Nisaba Action OS - Study Pack

Readable study documents for the irreversible-write mouth.

Source: [gate/study-pdfs/](#)

How to use

If words feel hollow, start at 18 (Layer 0 atoms). Then retrieve. Cash first (Friday send). Depth in parallel (15-20 min/day).

The four laws (only after you can define each word)

- can != may
- clearance != execution (write_executed false on Gate clearance)
- CHARGE-only resurrect (DEAD -> LIVE)
- Clear <=> reconstruct (presented AND LIVE)

Document list

- 18 Layer 0 atoms - START HERE if jargon is undefined (DENY, LIVE, Clear, ...)
- 01 SCIENCE - can/may and Tier-S contribution
- 02 Action OS - company nature
- 03 Science PRI - formal PRI and first weld
- 04 Mouth mechanics - fuse, fail-closed, /v1/act (REFERENCE/code)
- 05 Write edge - Cloudflare worker (REFERENCE/code)
- 06 Prefinality - Clear before finality (REFERENCE-heavy)
- 07 Married write - spend + tickets (REFERENCE/code)
- 08 Bind Room - money face
- 09 Friday send pack - outbound
- 10 Production honesty - their_production
- 11 Mouth literacy (NO CODE) - plain teaching after atoms
- 12 Code reading for Gate - map literacy
- 13 Foundations trunk - layer-1 heart without textbook cosplay
- 14 Cash & clearance arithmetic - GENERAL (Gate-tied)
- 15 Logic & irreversible acts - GENERAL (Gate-tied)
- 16 Read the system - GENERAL (Gate-tied)
- 17 Uncertainty lite - GENERAL (Gate-tied)

Suggested path

- Layer-0 path: 18 -> 11 -> 01 -> 02 -> 14 -> 08 -> 09 -> 15 -> 16 -> 17 -> 12 -> then code refs 04-07
- If weak at code: same as above; do not drown in 06/07 until atoms + 11 are blank-page solid

Near-term rule

Deploy live. Send Friday pack. Quit on clear. Own atoms before jargon. General docs sharpen judgment - they do not replace DEPOSIT asks.
