

Nisaba Action OS - Study Pack

Readable study documents for the irreversible-write mouth. Not marketing splash pages.

Source: [gate/study-pdfs/](#)

How to use

Read in order 01 through 10. After each document, close it and retrieve from memory: write the four laws blank-page, then check yourself.

The four laws (retrieve cold)

- can != may - ability is not permission for the irreversible write to complete
- clearance != execution - Gate /v1/act is permit-only; write_executed stays false
- CHARGE-only resurrect - DEAD returns to LIVE only via CHARGE, never soft admin yes
- Clear <=> reconstruct - presented AND LIVE (Prefinality); receipt alone is not enough at the effectuation boundary

Document list

- 01 SCIENCE - doctrine of can/may and Tier-S contribution
- 02 Action OS - company nature (Nisaba)
- 03 Science PRI - formal PRI laws and first weld
- 04 Mouth mechanics - fuse, fail-closed, /v1/act excerpts
- 05 Write edge - Cloudflare worker (exclusive execution door)
- 06 Prefinality - Clear before finality
- 07 Married write - spend protocol and tickets
- 08 Bind Room - money-face SKU
- 09 Friday send pack - outbound cash machine
- 10 Production honesty - their_production ladder

Near-term rule

Cash first: deploy live, send Friday pack, quit on clear. Depth in parallel: 15-20 minutes retrieval daily. Clearance rooms come after surplus.
