

Nisaba Action OS - Company Nature

What the firm is. Not homepage theater. Permission on irreversible acts; scarcity is the DENY.

Source: *gate/action_os.py*

Formula

Own permission on irreversible acts for any power that needs it - and make your scarcity the DENY, not the narrative.

Thesis

We serve everybody. Economies, politicians, companies - any entity that moves irreversible authority. Controversial or not: that is nature when you sit on the act. Palantir made knowing cheaper. Nisaba is the Action OS - governable irreversible action. Scarcity is the DENY.

Versus Palantir (equivalent map)

Palantir job: data integration

Palantir bite: fuse silos so power can see and act faster

Nisaba job: Action OS

Nisaba bite: fail-closed mouth before wire, bind, payout, force

Nisaba scarcity: the halt - not the story about the halt

Who we serve

Economies * treasuries * payment and settlement rails

Clear or halt irreversible money movement before the write completes

Politicians * states * public institutions

Permission mortality on authority that spends, binds, or forces

Companies * carriers * platforms * operators

One welded door on licensed payout or bind-only - register on cleared flow

Force * defense * public-safety irreversible release

Same mouth class: does the irreversible release complete? In category under serve-everybody. Not a claimed production weld today.

Any entity whose write is irreversible

Same mouth. Same CHARGE. Same stranger verify. No soft-yes for nice buyers only

Integrity

- CHARGE is the only DEAD->LIVE path - payer cannot buy a dashboard flip

- Stranger verify without login - exterior audit of the mouth
- One exclusive door per weld - no bypass UI / renewal / second write
- Fail closed on DEAD / timeout / 5xx - never treat UNREACHABLE as LIVE
- their_production stays false until a real production weld exists
- Force/battlefield doors stay unclaimed until welded - category != costume

Spec

SPEC: nisaba-action-os-v2

INVENTOR: Nisaba LLC

Integrity lines (from module docstring)

Force / battlefield authority is in the category. It is not a claimed production weld until someone pays for that door. Integrity is CHARGE-only, stranger verify, one door, fail-closed - not buyer purity theater.
