

Nisaba Action OS - Study Pack

Teaching docs first. Code dumps are quarantined. Own atoms before jargon.

Source: [gate/study-pdfs/](#) | Code dumps: [gate/study-pdfs/reference/](#)

HARD RULE: 04-07 and old 10 code dumps are REFERENCE ONLY (see [reference/*.code-dump.pdf](#)). Teaching versions replaced them in this folder. Start at 18 if any word is undefined. Cash first (Friday send).

How to use

Read teaching docs. After each, close it and retrieve from memory. If a word feels hollow, stop and open 18. Do not 'study' by scrolling Python.

The four laws (only after each word is defined)

- can != may
- clearance != execution (Gate clearance does not move the money)
- CHARGE-only resurrect (DEAD -> LIVE)
- Clear <=> reconstruct (presented AND LIVE)

Document list

- 18 Layer 0 atoms - START HERE when jargon is hollow
- 11 Mouth literacy - plain teaching of the firm
- 01 SCIENCE - why Gate sits between can and may
- 02 Action OS - what the company is
- 03 Science PRI - laws in plain + first weld
- 04 Mouth mechanics - TEACHING (code dump in reference/)
- 05 Write edge - TEACHING (code dump in reference/)
- 06 Prefinality - TEACHING (code dump in reference/)
- 07 Married write - TEACHING (code dump in reference/)
- 08 Bind Room - SKU/ops (not first literacy)
- 09 Friday send pack - outbound checklist
- 10 Production honesty - TEACHING (code dump in reference/)
- 12 Code reading for Gate - map literacy
- 13 Foundations trunk
- 14-17 General Gate-tied subjects

Suggested path

- 18 -> 11 -> 01 -> 02 -> 03 -> 14 -> 08 -> 09 -> 04 -> 05 -> 06 -> 07 -> 10 -> 15 -> 16 -> 17 -> 12
- Only open [reference/*.code-dump.pdf](#) after you can teach the law blank-page

Near-term rule

Deploy diligence live. Send Friday pack. Quit on paid Clear. Atoms before jargon. Teaching before code. External receipts before identity.
